

From draft to conversation.

Your field guide to setting up Night Watch, tailoring outreach and sending with confidence.

THE EVERYDAY WORKFLOW

01

Choose

02

Personalize

03

Test

04

Send

Your first email, in five moves

1

Set up your sender

More > Settings > Email accounts. Connect Gmail and save your identity.

2

Choose a company

Open your list. Read the research and check the selected contact.

3

Choose and edit a version

Compare the three options. Save one, then personalize the message.

4

Send yourself a test

Open it in your inbox. Check the wording, spacing and signature.

5

Send the reviewed email

Confirm the address and use Send email from the list owner's account.

JUMP TO A SECTION

[02 Sender setup](#)[03 Composer map](#)[04 Bulk edits](#)[05 Test and send](#)[06 Quick reference](#)

Start with the right sender.

Your list, the draft identity and the connected mailbox have different roles. Here is how they fit together.

SETUP PATH

More > Settings > Email accounts

1

Connect your Gmail

Connect the mailbox you will use to contact prospects. A self-test returns to this same inbox.

2

Set your name and greeting

Check your sender name and the greeting format. The app uses the selected list owner's sender settings.

3

Upload your signature

Save your HTML signature. The delivered email should retain its images, links and formatting. Verify it in a self-test.

WHEN YOU VIEW THE OTHER LIST

Josh views Suuchi's list

The draft uses **Suuchi's** name and signature. Josh can review it and test it in his own inbox.

Suuchi sends to a prospect

Suuchi signs in and sends from **her connected mailbox**. Viewing a list does not switch your account.

Both teammates can view both lists. Prospect sends require the list owner's account.

Meet your composer.

Choose the message first. Then edit, preview and use the action bar at the bottom.

SIMPLIFIED INTERFACE MAP / NOT A LIVE SCREENSHOT

The interface is a light gray rounded rectangle containing four numbered steps:

- 1 Recipient name and company**
Below the header, there are two tabs: **Email** (active) and **LinkedIn**.
Below the tabs, there are three buttons: **Direct Offer** (dark gray), **Concrete Idea** (light gray), and **Delivery Experience** (light gray).
- 2**
Below the buttons, there are two buttons: **Edit** (dark gray) and **Preview** (light gray).
- 3**
Below the buttons, there are two labels: **From Suuchi** and **More**.
- 4**
Below the labels, there are two buttons: **Send test to myself** (light gray) and **Send email** (dark gray).

Below the numbered steps, there is a section for the email content:

Subject **Your tailored subject**

Hi Louis,

Your message, written for this person and company.

1 / Check who receives it

Verify the selected name and address. An inferred address is not a verified mailbox.

2 / Compare three approaches

Direct Offer introduces the offer; Concrete Idea proposes a workflow; Delivery Experience explains how Nine-67 works.

3 / Make it yours

A card opens a preview. Use this version saves it; Edit this version opens it for editing. Cancel returns to your saved draft.

4 / Test, then send

Preview the copy and signature. Self-test before contacting the prospect. More holds secondary actions.

Change the list deliberately.

Use shared wording where it belongs. Keep each contact's tailored message where it matters.

SUBJECT / IN EDIT MODE

Your new subject

Apply to all

Edit the subject and click **Apply to all**. That exact subject is applied to the selected list's unsent drafts. Message bodies stay unchanged.

OPENING / EXPAND "SET AN OPENING FOR ALL EMAILS"

Write one opening paragraph and click **Apply opening to all**. It replaces the first paragraph after each greeting.

BEFORE

Hi Louis,

Existing opening paragraph.

Company-specific message + CTA

AFTER

Hi Louis,

Your new shared opening.

Company-specific message + CTA

What stays protected

Each recipient's greeting, the rest of their message, sent emails and the other list are preserved. Edited and approved drafts are included if they have not been sent.

Before applying: keep a copy if you may want to restore the old wording; there is no bulk Undo. Read the completion count, then spot-check a few companies. Choosing another saved version later replaces that draft's applied copy.

Test is not Send.

Use your inbox to check the actual delivered email. Then take the separate action to contact the prospect.

SEND TEST TO MYSELF

Goes only to your inbox.

Uses your connected Gmail. Keeps the selected list owner's draft and signature. Does not contact prospects, add CCs or start follow-ups.

SEND EMAIL

Goes to the prospect.

Requires the list owner's account. Review the recipient and send confirmation. The send is recorded for history and follow-up work.

Your inbox check

Read the subject, greeting and full message. Confirm the signature image and links appear, the name is right and paragraphs are spaced naturally. When testing another person's list, the test From header is still your own mailbox.

Your final send check

Confirm the address and its status. Save the version you want, finish your edits and Preview. Click Send email and review the confirmation. If you are viewing the other person's list, sign in as its owner to contact the prospect.

Sending through LinkedIn

Choose LinkedIn, compare its three messages, then use Open LinkedIn and send there. After actually sending, choose **More > Mark as already sent** to record it. Copying alone does not record a send.

If a test fails, read the error before retrying. The limit is five tests per ten minutes.

Keep the work moving.

Where to go next, what the results mean, and what to check when something looks wrong.

YOUR NAVIGATION SHORTLIST

Follow-ups Review queued messages, recipients and timing. Automatic sequences stop on a detected reply.

People Check contact roles, addresses and LinkedIn details. Inferred addresses remain unverified candidates.

More > History Review recorded outreach and replies. Check the sent version before following up.

More > Results Compare recorded sends and replies by version. Self-tests are excluded; opens are incomplete signals.

IF SOMETHING LOOKS WRONG

Wrong sender name

Check the selected list and that owner's saved sender settings.

Missing or odd signature

Review the uploaded HTML in Settings, save it and self-test again.

Cannot send a prospect email

Check the address, list owner and Gmail connection. Review the displayed error.

Unexpected wording

Check the chosen version and saved edits before restoring the recommended draft.

Need a guided walkthrough?

Use the compass / Tour button in the top bar. Escape closes the tour.
